

## **International Shipping with Postal Package Partner (PPP) from Window Book, Inc.**

**Postal Package Partner's Global Express Mail Manifesting Module** enables clients to:

- Ship Global Express Mail™, which is a trackable service, to 225 countries
- Use a USPS Corporate Account for an immediate minimum discount of 5%
- Print the long customs form to plain paper.

To manifest Global Express with the U.S. Postal Service (USPS), clients need to apply for a USPS Corporate Account and to complete an Express Mail Manifesting Application. Window Book is pleased to work with clients and their Postal Representatives to complete this process more easily.

**Postal Package Partner's International Manifesting Module** supports the following USPS classes, and may be combined with the Global Express Module described above:

- Global Priority Mail®
- Global Airmail Parcel Post
- Global Airmail Letter-post
- Global Economy Parcel Post
- Global Economy Letter-post

This module allows clients to process and ship to the countries that are supported by these five postal mail classes. Again, clients are able to print the long customs form to plain paper. The module enables clients to manifest or to pay for these 5 classes using their postal Permit Account, which does not reveal the price of postage on the shipping label. With this module, Postal Package Partner allows users to combine their domestic and international manifest shipments and produce a combined postage statement for the USPS.

**Postal Package Partner's International Shipping Modules  
can be purchased separately or bundled together.**

**The base Postal Package Partner versions support APO/FPO shipments.** If you are still filling out Customs Forms by hand for your APO/FPO shipments, the answer lies with Window Book and your PPP system. For many years, Postal Package Partner's Standard, Gold and Advanced Versions have supported APO/FPO shipments, including the ability to print the relevant information from an APO/FPO shipment onto the laser Customs Form. For your convenience, we now carry and sell these Customs Forms. If you have not already done so, it is easier than ever to automate this function. Call today.
