

Superior Postal Scales

Easy to use and highly accurate!

Avery Weigh-Tronix 7620

Weigh letters and parcels, all on one scale! Ideal for both large and small businesses.

Expand your business and start overseas mailings which require 1/2 ounce accuracy.

Accurate and reliable “Quartzell” transducer provides the highest repeatability for consistent weight measurement.

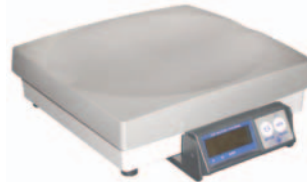

This high resolution postal classifier offers:

- 100 lb. capacity with a resolution of one-tenth of one ounce
- Fast digital response: the digital signal allows the scale to weigh faster to improve throughput in the weight ranges that are critical for flats and small packets
- Only a few working parts: reduces the need for servicing
- Reliability: two quartz crystals eliminate external influences such as temperature, pressure, and other environmental interferences
- A compact, low-profile, 12”x 14” base - ideal for desktop, workstation, or point-of-sale
- Full one-year warranty. Serial port adapter and cable are included

Interfacing this scale with Window Book’s Postal Package Partner™ (PPP) shipping & manifesting software program allows the end user to use a single scale for both letters and parcels.

PPP’s Scale Driver Setup Wizard automatically scans for the presence of the scale and sets the interface parameters. It instantly displays the weight of your mailpiece in the Daily Shipping Window and gives you the postage requirement for any domestic service.

High-performance Scanners

Equipped for both In-Stand & Out-of-Stand operation

**MS9520
Triggerless Scanner**

The **MS9520 Voyager Triggerless Laser Scanner** for the US Postal Service™ is perfect for many applications, including point-of-sale, inventory control, commercial/ warehouse applications, and shipping software.

With its aggressive performance and comfortable design, Voyager is far and away the most advanced scanner on the market today.

The feature-packed MS9520 Voyager comes equipped with PowerLink user-replaceable cables and power supply, MetroSelect one-code programming, MetroSet Windows-based software configuration utility, Bits n' Pieces data editing utility, and an Electronic Article Surveillance (EAS) option.

MS9540 Trigger Reader

The **Metrologic MS9540 Trigger Reader** is ideal for all scanning applications, including menu scanning, Point-of-Sale, document processing, and inventory, just to name a few.

The Voyager is ideal for shipping with the USPS® and it automatically senses when it is placed in the stand and deactivates the CodeGate button.

Thermal Label Printers

The industry's best, low-cost direct thermal label printers

Zebra LP 2844

The **Zebra LP 2844** direct thermal desktop bar code printer lets you print labels at four inches per second!

It is equipped with a new generation controller board, motor, and power supply in a sturdy, double-walled casing.

- Enhanced printhead provides 203dpi print resolution
- "Open ACCESS" for fast and easy media loading

Other powerful features include: 512KB Flash memory (standard) for forms, graphics, and external font storage; 256KB SRAM for longer label lengths; standard parallel, serial, and USB interfaces; fonts and character sets; and Zebra Programming Language.

LT8 Thermal Printer

The Whittier LT8 Thermal Printer is a rugged and dependable thermal transfer/direct thermal printer that can be used with DAT-MAIL, TagMaster, and Postal Package Partner.

It is capable of both direct thermal and thermal transfer printing, the LT8 can print tray and sack tags as well as USPS shipping labels with Delivery Confirmation. The print head density is 203 dpi, with a speed rating of 6 ips (inches per second).

Order your Scale, Scanner and Printer today and benefit from its interface with Window Book's Postal Package Partner™, the delivery confirmation and manifesting shipping software for the US Postal Service™.
