

Now you can automatically calculate and compare piece weights

Simply connect your scale to your PC and let **Scale Companion** calculate piece counts & weights for you.

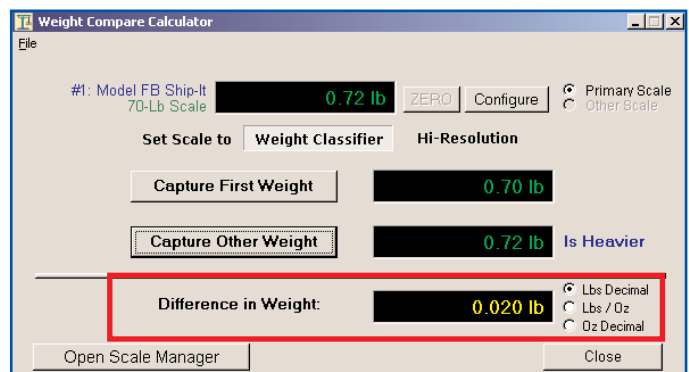

Scale Companion enables you to calculate accurate piece weights with a simple click!

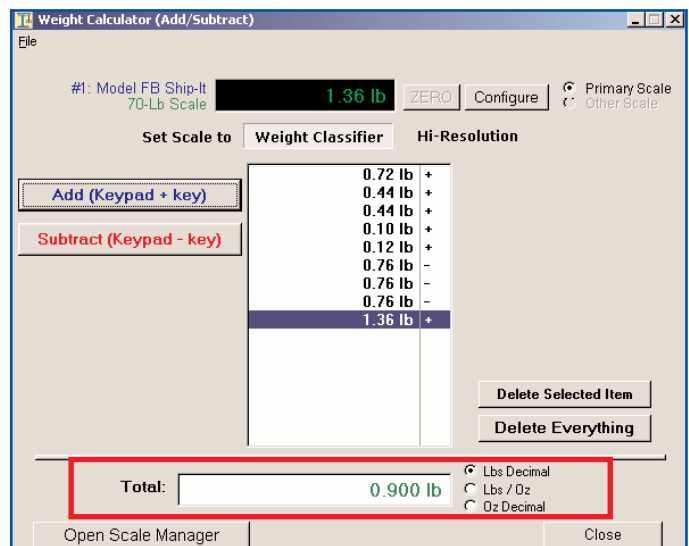

Parcel Shipping Scale: Example of a scale with max load of 70 lb.

- Easily calculate the difference between two weights with **Weight Compare Calculator**.
Simply capture the weights of the two items and let Scale Companion calculate the difference for you all on one screen.
- Add or subtract weights and quickly get the total weight with **Weight Calculator**.
You don't have to hassle with an additional calculator anymore - the Weight Calculator automatically computes the final weight.
- Save time by instantly calculating totals when you have multiple pieces of the same weight using **Piece Count Calculator**.

For example, you can quickly calculate the total number of pieces in a ream of paper based on the weight of 40 single pieces of paper.

Weight Compare Calculator easily calculates the difference between two weights.

Weight Calculator allows you to add or subtract weights and quickly get the total weight amount.

Stop manually calculating weights and numbers!

Let **Scale Companion** Read, Compare and Total parcels for you automatically.

- Handy **Pop-Up Calendar** enables you to view and plan your mailings ahead of time.
- Easily convert weight units 5 different ways automatically with **Weight Conversion Calculator**.

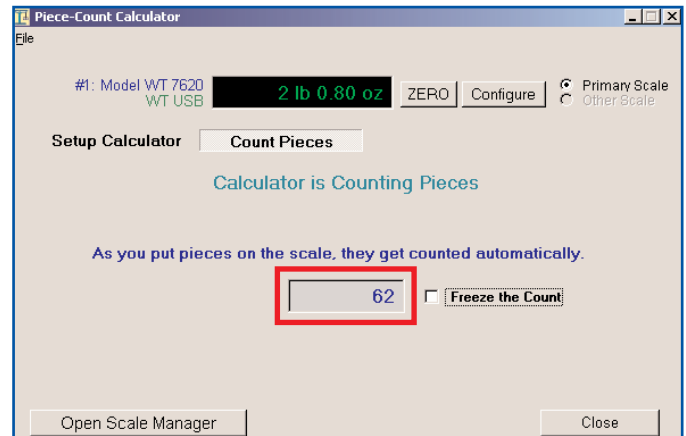

Save yourself the extra labor of using an additional calculator to convert weight units.

This built-in weight conversion calculator lets you save time while producing accurate conversion.

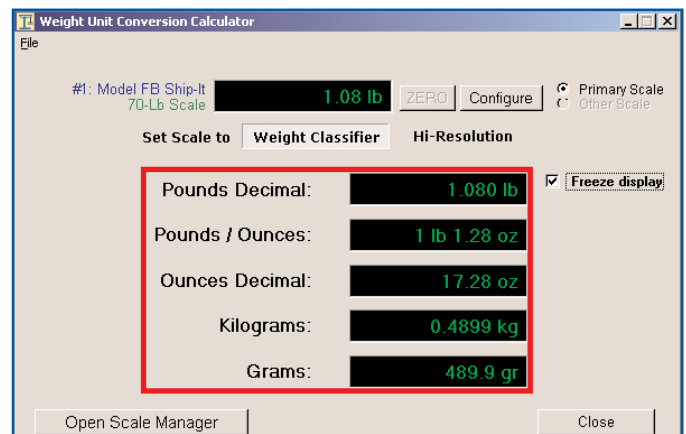

Scale Companion is your perfect companion to calculate and total parcels for you.
